### Abstract

Does the regional concentration of immigrants of the same ethnicity affect immigrant children's acquisition of host country language skills and educational attainment? We exploit the concentration of five ethnic groups in 1985 emanating from the exogenous placement of guest workers across German regions during the 1960s and 1970s. Results from a model with region and ethnicity fixed effects indicate that exposure to a higher own ethnic concentration impairs immigrant children's host country language proficiency and increases school dropout. A key mediating factor for the detrimental language effect is parents' lower speaking proficiency in the host country language, whereas inter-ethnic contacts with natives and economic conditions do not play a role in language proficiency or educational attainment.

### Highlights

- We argue that women's political empowerment (WPE) should enhance economic growth, by facilitating technological innovation.
- We find robust evidence that WPE is positively related to subsequent GDP per capita growth, across 182 countries and 221 years.
- The estimated relationship is sizeable: Improvements in WPE correspond to large long-runs gains in economic development.
- Consistent with our proposed mechanism, WPE is also robustly related to total factor productivity growth, a proxy for technological change

#### Evaluation of newly established buffalograss for tolerance to glyphosate

Matthew B. Bertucci, Doug E. Karcher, Mike D. Richardson, Daniel P. O'Brien

Crop, Forage & Turfgrass Management | First Published: 11 May 2022

#### Core Ideas

- Newly planted buffalograss was not injured by the 0.1× rate of glyphosate.
- Glyphosate reduced buffalograss quality at rates at and above 0.25× the maximum labeled rate.
- Buffalograss seedlings can recover from glyphosate injury, but only at 0.1× and 0.25× rates.

**Search Tips**

You can use the Boolean operators AND (also + or &), OR and NOT (also -) within search fields. These operators must be entered in UPPERCASE to work.

If more than one term is entered, and no operators are specified, terms are searched using AND. To search for a phrase, put the terms in quotes. For example, *spinal cord* searches spinal AND cord while "spinal cord" finds this exact phrase.

**Wildcards**

Use a question mark (?) in a search term to represent a single character (*wom?n* finds women or woman). Use an asterisk (\*) to represent zero or more characters. For example, *plant\** finds all words with that root (plant, plants, & planting) while *an\*mia* finds variants with one or more letters (angmia & anemia). Wildcards CANNOT be used at the start of a search term (*\*tension*) or when searching for phrases in quotes (*"tobacco smok\*"*).

**Author Search**

Author names may appear with full first names or just initials. Place author names in quotes to find a specific name and its variants. For example, "John Smith" finds articles by John Smith, John K Smith and John Colby-Smith while "J Smith" finds articles by J Smith, JR Smith, John Smith and Julie Smith.

Abstract

Increasing evidence—synthesized in this paper—shows that economic growth contributes to biodiversity loss via greater resource consumption and higher emissions. Nonetheless, a review of international biodiversity and sustainability policies shows that the majority advocate economic growth. Since improvements in resource use efficiency have so far not allowed for absolute global reductions in resource use and pollution, we question the support for economic growth in these policies, where inadequate attention is paid to the question of how growth can be decoupled from biodiversity loss. Drawing on the literature about alternatives to economic growth, we explore this contradiction and suggest ways forward to halt global biodiversity decline. These include policy proposals to move beyond the growth paradigm while enhancing overall prosperity, which can be implemented by combining top-down and bottom-up governance across scales. Finally, we call the attention of researchers and policy makers to two immediate

**СТАТИСТИКА**

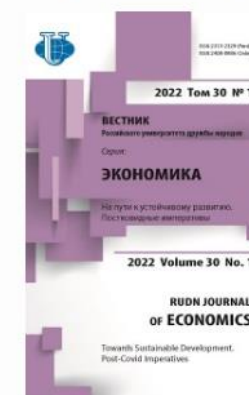

## Аннотация

В настоящее время прогнозирование мировой динамики переживает определенный кризис, проявлением которого явилась неспособность вовремя предсказать мировые финансово-экономические потрясения. Для преодоления существующих проблем необходимо заново осмыслить роль одного из важнейших детерминантов возникновения кризисов, а именно денег. В настоящей статье освещены причины генезиса кризисных явлений в экономике и обществе в целом. Основной целью статьи является осмысление роли денег в данном процессе и анализ их современных социальных функций, критический анализ «финансомики». Констатируется, что роль денег в современной экономике радикально меняется, но одновременно растет турбулентность и изменяется характер динамики экономики. Экономика становится финансово зависимой, значение денег и финансов в современном хозяйстве резко возрастает. Изложены концептуальные положения новой современной философии денег, произведен сравнительный критический анализ взглядов известных ученых на функцию и роль денег. Авторы приходят к выводу о недооценке роли финансов в хозяйственной жизни и необходимости развития новой философии денег постиндустриального общества в условиях глобализации.

The image shows a browser window displaying the Google Scholar search results for the query "economic growth". The browser's address bar shows the URL: scholar.google.com/scholar?hl=en&as\_sdt=0%2C5&q=economic+growth&btnG=&oq=economic+... The page features the Google Scholar logo and a search bar with the query "economic growth". Below the search bar, there are filters for "Articles" and "Case law", and a quote: "Stand on the shoulders of giants". The search results are displayed in a list format, with each entry including the title, author, publication information, a brief description, and citation statistics. The results are sorted by relevance. The first result is "Introduction to economic growth" by D Acemoglu, published in the Journal of economic theory in 2012. The second result is "A model of economic growth" by N Kaldor, published in The economic journal in 1957. The third result is "Economic growth" by RJ Barro and XI Sala-i-Martin, published in 2003. The fourth result is "Theory of economic growth" by WA Lewis, published in 2013. The page also includes a "Related searches" section with terms like "foreign direct investment", "human capital", "investment", "empirical", "inflation", "expenditure", "countries", and "financial development". At the bottom, there are links to PDF versions of some articles, such as "analytics.ng", "academia.edu", "aueb.gr", and "nber.org".
